## Manufacturing Execution System

with Siemens TIA Portal  
OPC-UA Client Server

**Learning situation:** Realization of the MES <-> PLC / task collection interface

Competence area / subject: Professional competence

School type / occupational field / occupation: Vocational / technical school / electrical engineering / mechatronics

- Requirement area: Compare and select communication interfaces of an MES. Configure and program the selected interface

Time range: 2 units

Learning factory: Festo CP-Factory and CP-Labs, module turning

Technical settings: Projector, PC with Windows, tablet (WLAN). Internet access, S7 1500 CPU

Software: OPC UA clients with .NET from SIEMENS / TIA V14

**Brief description and learning objectives** this lesson sequence:

- Handshake
- Program analysis fbProcessControl
- Program analysis fbMES-Basic-UA
- Implementation "MES\_REQUEST"
- Implementation "MES\_RESULT"

Information about the learning factory

The i4.0 project Offenburg comprises three pillars:

**1. Expansion of the basic laboratory** Drive technology

The basic laboratory was additionally equipped with a servo machine test bench for examining the various electrical machines from Lukas-Nülle. Part of the acquisition is also the Interactive Lab Assistant from Lukas Nülle, with whose help the pupils can work on the interactive experiment set-ups.

**2. Basic control technology laboratory** with 4 CP Labs from Festo Didactic.

The CP Labs are equipped with the application modules "turning", "stacking magazine", "measuring analog", "workpiece output". A CPU 1512 from Siemens is located in each CP Lab. Another module is additionally equipped with an industrial camera from Sick and a module with a Keyence SR-2000 industrial camera for the recognition and evaluation of QR codes by the PLC

3. **CP Factory Industry 4.0** from Festo Didactic with the modules “high-bay warehouse”, “basic module switch”, “robot assembly cell with Kuka KR6”, “robot loading cell with Kuka KR6”, “CNC Concept Mill 55”, “basic module with application turning”, “basic module with Analog measurement application ”, “ Basic module with drilling application ”, “ Basic module with pressing application ”, “ Basic module with heating application ”, “ Basic manual workstation module ”, “ Docking AGV ”module and self-propelled AGV system” Robotino ”.
